

Nights Into Dreams Ps 3 Trophy Guide

Introduction: Unlocking the Dream World’s Secrets

Few games from the Sega Saturn era have aged as gracefully as **NiGHTS into Dreams**. When this whimsical, flight-based adventure was re-released on the PlayStation 3 as a downloadable title, a whole new generation of players—and nostalgic veterans—was given the chance to experience its ethereal beauty. But for trophy hunters, the journey goes far beyond simply gliding through the dream world. The **Nights Into Dreams PS3 Trophy Guide** you are about to read will break down every single achievement, offer practical strategies, and help you earn that coveted platinum without losing your mind (or your sense of wonder).

Originally developed by Sonic Team and directed by Yuji Naka, NiGHTS into Dreams is a unique hybrid of racing, exploration, and score-chasing. The PS3 version, based on the 2008 *PS2* remake (which itself was based on the Saturn original), brings updated visuals, widescreen support, and a full Trophy list. Whether you are a seasoned dream-dweller or a newcomer still learning to pull off a paraloop, this guide will serve as your complete companion from start to finish.

Understanding the Trophy List: The Big Picture

Before diving into the nitty-gritty of individual trophies, it helps to understand the structure of the list. The **Nights Into Dreams PS3 Trophy Guide** covers a mix of story progression, score thresholds, hidden collectibles, and a few genuinely tricky challenges. The full list includes:

- 1 Platinum Trophy
- 3 Gold Trophies
- 8 Silver Trophies
- 29 Bronze Trophies

That makes a total of 41 trophies. The good news? None of them are missable in the traditional sense, because you can replay any level at any time. The less good news? A few of them demand near-perfect execution and deep knowledge of the game’s scoring mechanics. But don’t worry—by the end of this guide, you will have all the tools you need.

Key Concepts You Must Master

To make sense of the trophy list, you first need to understand three core mechanics that are central to almost every challenge:

1. **The Paraloop** – Perform a 360-degree loop around a cluster of Blue Chips or an enemy to collect them all at once. This is the single most important skill in the game and the foundation of high scores.
2. **Linking** – Each paraloop creates a link. The more links you chain together without dropping anything, the higher your Link Bonus at the end of the round. This is where massive points come from.
3. **Mare / Nightopian Rescue** – In each level, you must rescue a certain number of Nightopians (little dream creatures) to complete the stage. Some trophies require you to save every single one.

If you can paraloop efficiently and maintain long chains, you are already 70% of the way to the platinum.

Story Progression Trophies: The Easy Foundation

These trophies are earned simply by playing through the game’s main mode. You will likely unlock most of them within your first few hours.

Enter the Dream World

Bronze – Complete the Prologue. This is essentially the tutorial. You cannot miss it, so sit back and enjoy the dreamy introduction.

A Visitor from the Real World

Bronze – Complete the first level of the Spring Valley area. This is the first real stage, and it introduces enemy paraloops and Nightopian rescue.

The Path to the Ideya Palace

Bronze – Complete the third level of the Spring Valley area. By this point, you should be comfortable with basic movement and paralooping.

Dreams That Never End

Silver – Complete the game by finishing the final boss. The boss fights in NiGHTS into Dreams are more about pattern recognition than raw speed. Take your time, paraloop the orbs the boss shoots, and you will prevail.

Again into the Dream World

Bronze – Unlock the option to play as Claris’s or Elliot’s dream counterpart. This happens automatically after you complete the game once with either character.

Score and Link Trophies: Where the Real Challenge Begins

These trophies are the heart of the **Nights Into Dreams PS3 Trophy Guide** and will require genuine effort. They test your ability to chain links and achieve high scores.

Link Beginner

Bronze – Achieve a Link Level of 3 or higher. This means you need to complete three consecutive paraloops without dropping a Blue Chip or losing an enemy from your loop. This is very easy in the early levels.

Link Intermediate

Silver – Achieve a Link Level of 5 or higher. You will need a longer chain. Try this in the first level of Spring Valley, where there are plenty of Blue Chips and enemies close together. Fly in a straight line, paraloop a cluster, then immediately fly to another cluster. The key is speed—do not pause between loops.

Link Master

Gold – Achieve a Link Level of 7 or higher. This is one of the toughest trophies in the game. At Link Level 7, you cannot afford a single mistake. The best place to attempt this is in the final level of Spring Valley (the frozen area) or in the water level of the second world. Practice the route until it becomes muscle memory. Use the dashing mechanic to reach the next cluster before your current link expires.

Tip: The link timer is generous at low levels but becomes very strict at level 6 and above. If you see a cluster that is too far away, skip it. Breaking the chain is worse than missing one cluster.

High Scorer (Bronze, Silver, Gold, Platinum)

There are four trophies for achieving cumulative total scores: 50,000 points, 100,000 points, 200,000 points, and 500,000 points. These are cumulative across all your playthroughs, so they will come naturally as you grind for other trophies. Do not stress about these—focus on the Link trophies and the rest will follow.

Collectible and Exploration Trophies: Becoming a Nightopian Saviour

These trophies reward thorough exploration and a gentle touch with the dream creatures.

Nightopian Collector (Bronze, Silver, Gold)

There are three trophies for rescuing a cumulative total of Nightopians: 100, 500, and 1125. Yes, 1125 is the maximum number of Nightopians in the entire game across all levels with both characters. This trophy requires you to rescue every single Nightopian in every level, with both Claris and Elliot, across all three worlds (Spring Valley, Splash Garden, and Frozen Bell).

Some Nightopians are hidden behind breakable walls or in alcoves. Fly slowly and listen for their little cries. If you miss one, you can replay the level from the stage select screen. Use a checklist if necessary—there is no shame in tracking them manually.

Dr. Clash’s Assistant

Silver – Collect all of Dr. Clash’s robot parts in a single playthrough of the game. Dr. Clash is the game’s recurring antagonist, and his parts are hidden in specific locations. You must collect all of them in one continuous run (you can restart levels, but you cannot quit to the main menu). This is easiest on a second playthrough when you know where they are. Watch a video guide for the exact locations—they are not random.

Ideya Hunter

Gold – Collect all the Ideya (the coloured orbs) in every level. There are six Ideya in each of the game’s three worlds (two per level), plus a special one in the final boss stage. This trophy is time-consuming but straightforward if you follow a checklist. Each Ideya is hidden in plain sight or behind a simple puzzle.

Boss and Challenge Trophies: The True Tests of Skill

These trophies will push you to your limits. They require not just knowledge, but flawless execution.

Perfect Boss Battle

Gold – Defeat any boss without taking damage. The easiest boss to do this on is the first boss: Clawz. His attack pattern is slow and predictable. Fly around him in wide circles, paraloop the orbs he shoots, and never stay still. If you get hit, pause and restart the level immediately. This trophy can be earned in either the story mode or the boss rush mode.

Time Attack Master

Silver – Complete any level in Time Attack mode with a rank of A or higher. Time Attack mode removes the score requirement and instead challenges you to finish the level as fast as possible. You need to rescue the required Nightopians and reach the exit quickly. The best level for this is the first level of Spring Valley, which is short and has a straightforward layout. With practice, you can finish it in under 40 seconds.

Score Attack Champion

Silver – Achieve an S-Rank in any level in Score Attack mode. Score Attack is the opposite of Time Attack—you have infinite time, but you need a massive score. This is where your paralooping and linking skills are put to the ultimate test. Use the same strategy as for the Link Master trophy: chain as many links as possible, rescue every Nightopian, and destroy every enemy. The first level of Spring Valley is again the easiest due to its density of targets.

Hidden and Miscellaneous Trophies: The Surprises

A few trophies fall outside the main categories. They are easy to miss if you do not know about them.

NiGHTS Fan

Bronze – View the credits. You can do this from the main menu after completing the game once. No trick here—just let them roll.

Dream Collector

Bronze – Collect all the present boxes in the Christmas NiGHTS bonus level. Yes, the PS3 version includes the Christmas NiGHTS level from the Saturn days. It is a short, festive stage with presents scattered around. Fly through them all and the trophy is yours.

Jingle All the Way

Bronze – Find and collect all the bells in the Christmas NiGHTS level. There are five bells hidden in the level. They are small and chime softly when you are near them. Listen carefully and explore every corner.

Advanced Strategies for the Hardest Trophies

Now that we have covered every trophy individually, let us consolidate the most important strategies into a single battle plan. If you follow this roadmap, you will earn the platinum in the most efficient order possible.

Step 1: Complete the Game Twice

Play through the story once as Claris and once as Elliot. Do not worry about scores or collectibles on your first playthrough—just learn the levels, the boss patterns, and the paraloop timing. This will unlock most of the bronze trophies and give you a solid foundation.

Step 2: Resume All Nightopians

Using a checklist, go back and rescue every Nightopian in every level with both characters. This will also naturally

lead you to discover many of the Ideya and Dr. Clash’s parts. Use the stage select screen to replay levels without losing your progress.

follow naturally. Practice the first level of Spring Valley until you can do it in your sleep—literally, given the game’s theme.

Step 3: Score and Link Grind

Step 4: Clean Up the Remaining Trophies

Focus on the Link Master trophy. Once you can consistently achieve a Link Level of 7, the Score Attack S-Rank will

Go for the Time Attack trophy,
