Core Topics Covered in the Sociology 100 Custom Text

The **Introduction to Sociology Custom Edition for SOC 100 at Strayer University** is structured to guide you through the foundations of sociology in a logical progression. Below are the major thematic areas you can expect to explore.

Sociological Perspectives and Theories

The custom edition begins by introducing the three major sociological paradigms: **functionalism**, **conflict theory**, and **symbolic interactionism**. Understanding these perspectives is like putting on different pairs of glasses—each one reveals a different aspect of social reality. The custom text explains how functionalists see society as a system of interrelated parts working together, while conflict theorists focus on inequality and power struggles. Symbolic interactionism, on the other hand, zooms in on daily interactions and the meanings people attach to symbols and actions. This foundational knowledge sets the stage for everything else in SOC 100.

Culture, Socialization, and Social Structure

What makes a culture? How do we learn to become functioning members of society? This section of the custom edition dives into the building blocks of social life. You will examine the components of culture—language, norms, values, and material artifacts—and how they influence behavior. The concept of socialization is explored from infancy through adulthood, with special attention to agents of socialization like family, schools, peers, and media. The text then covers social structure, including statuses (ascribed, achieved, master status) and roles, as well as larger structures like groups, organizations, and institutions. These concepts are particularly relevant for Strayer students, many of whom are balancing multiple roles as workers, parents, and students.

Social Inequality, Race, and Gender

No sociology course is complete without a critical look at inequality. The custom edition for SOC 100 dedicates substantial space to social stratification, including class, race, ethnicity, and gender. You will learn about the difference between individual prejudice and institutional discrimination, the dynamics of power and privilege, and the ways systemic inequality shapes life chances. The custom version often includes updated data and examples that reflect current social movements (such as #MeToo and Black Lives Matter), making the material resonant and immediate. Understanding these topics is key to becoming a critical thinker about social justice—a core goal of Strayer's general education.

Social Institutions (Family, Education, Religion, Economy)

Sociologists consider institutions as stable patterns of behavior that meet societal needs. The custom edition explores the major institutions:

- **Family:** Its functions, variations across cultures, and contemporary challenges like divorce, same-sex marriage, and cohabitation.
- **Education:** The role of schooling in social reproduction, the hidden curriculum, and issues like school funding inequality.
- **Religion:** Types of religious organizations, secularization, and the relationship between religion and social change.
- **Economy and Politics:** The shift from industrial to post-industrial economies, capitalism vs. socialism, and the power of corporations.

Each institution is examined through the lens of the three major paradigms, helping you see how different perspectives reveal different insights about the same institution.

Social Change and Global Issues

Finally, the custom edition covers the dynamics of social change—how societies evolve, the role of social movements, and the impact of technology and globalization. For SOC 100, this section often includes discussions on urbanization, the environment, and global inequality. The custom edition may feature a case study on a contemporary social movement or a comparative analysis of societies around the world, emphasizing how the sociological imagination connects "personal troubles" to "public issues" on a global scale.
