A complete set of documentation, including the manual, maintenance records, and window sticker, can add hundreds of dollars to the selling price. Keeping your 2010 Dodge Charger SRT8 owners manual in the glove box signals to potential buyers that the vehicle has been cared for and that you respect the manufacturer's guidelines.

Key Sections of the 2010 Dodge Charger SRT8 Owners Manual

The manual is divided into several logical sections. Understanding what each section covers will help you find the information you need quickly. Below is a breakdown of the most important chapters.

Introduction and Safety Features

The introductory section of the **2010 Dodge Charger SRT8 owners manual** provides an overview of the vehicle's key features and a description of the instrument panel. It includes warning symbols and labels that you will find throughout the car, such as those on the sun visors, under the hood, and on the door panels. This section is essential for learning the location of safety equipment, including seat belt pretensioners, airbag sensors, and the LATCH system for child seats.

Additionally, the manual covers the proper use of the key fob and the Sentry Key Immobilizer system. If you have ever experienced a key that would not start the engine, you know how frustrating it can be. The manual explains how to program additional keys and what to do if the system malfunctions.

Understanding Your Instrument Panel

The instrument cluster in the SRT8 is performance-oriented, with a 180-mph speedometer and a tachometer that redlines at 6,200 rpm. The 2010 Dodge Charger SRT8 owners manual provides a detailed diagram of every gauge, indicator light, and digital display. This section explains what each warning light means, from the Check Engine light to the low tire pressure indicator.

One of the most useful parts of this section is the explanation of the Electronic Vehicle Information Center (EVIC). The EVIC allows you to customize settings such as automatic door locks, display units (miles vs. kilometers), and performance timers. Without the manual, many owners never discover these features, leaving them underutilized.

Starting and Operating the Vehicle

This is arguably the most practical section of the **2010 Dodge Charger SRT8 owners manual**. It covers the starting procedure, including the use of the remote start system if equipped. It also explains the different transmission modes: Drive, Sport, and Manual. In Sport mode, the transmission holds gears longer and shifts more aggressively. The manual details how to use the AutoStick feature, which allows you to manually select gears using the shift lever or steering wheel paddles.

For those who want to explore the car's performance limits, this section includes information on the Electronic Stability Control (ESC) system. You can learn how to turn off traction control partially or fully, which is necessary for spirited driving on a closed course. The manual also provides guidance on proper engine break-in procedures, which is critical for new or rebuilt engines.

Maintenance and Care: Keeping Your SRT8 in Top Shape

Performance vehicles require more frequent and specialized maintenance than standard sedans. The 2010 Dodge Charger SRT8 owners manual includes a comprehensive maintenance schedule that outlines exactly what needs to be done and at what intervals. Following this schedule is the best way to preserve the engine, transmission, and suspension components.

Oil and Fluids

The 6.1-liter HEMI engine has specific oil requirements. The manual specifies the recommended viscosity, API rating, and capacity. Using the wrong oil can lead to reduced performance or even engine damage. The manual also covers transmission fluid, brake fluid, and coolant specifications. For example, the SRT8 uses a specific type of coolant that is different from standard vehicles. Always refer to the **2010 Dodge Charger SRT8 owners manual** before adding any fluids.

Tire Rotation and Pressure

The SRT8 comes with 20-inch wheels and high-performance tires. Tire pressure is critical for handling and safety. The manual provides the recommended tire pressures for both normal driving and high-speed driving. It also includes the correct tire rotation pattern. Given the cost of performance tires, following these guidelines will extend their life and improve fuel economy.

Brake System

With 425 horsepower on tap, the braking system must be in perfect condition. The **2010 Dodge Charger SRT8 owners manual** includes information on the brake pad wear indicators, brake fluid level checks, and the proper procedure for bedding in new brake pads. Bedding in pads is a specific process that ensures optimal friction and longevity. Many owners skip this step, leading to premature brake fade.

Technical Specifications and Capacities

For the technically inclined owner, the specifications section of the manual is a goldmine. It lists every capacity, from the fuel tank (19 gallons) to the engine oil (7 quarts with filter). It also provides the recommended spark plug gap, torque specifications for lug nuts (130 ft-lbs), and the serpentine belt routing diagram.

Dimensions and Weights

Knowing the exact dimensions of your vehicle is helpful for garage clearance, parking, and towing. The 2010 Dodge Charger SRT8 owners manual includes overall length, width, height, and ground clearance. It also lists the curb weight and gross vehicle weight rating (GVWR). This information is useful for selecting the correct tire load rating and ensuring you do not overload the vehicle.

Fluid Capacities

A quick reference table in the manual shows the capacity of every fluid reservoir. This includes engine oil, transmission fluid (approximately 4.7 quarts for the 5-speed automatic), coolant (approximately 15 quarts), and washer fluid. Having this information readily available makes it easier to perform DIY maintenance without guesswork.

Troubleshooting and Common Issues

No vehicle is perfect, and the SRT8 is no exception. The **2010 Dodge Charger SRT8 owners manual** includes a troubleshooting section that addresses common problems. This includes issues like the engine not starting, unusual noises, and warning lights illuminating. The manual provides a logical step-by-step approach to diagnosing these issues.

What to Do When a Warning Light Appears

One of the most stressful moments for any driver is seeing a warning light on the dashboard. The manual categorizes warning lights by color. Red lights indicate a serious issue that requires immediate attention. Yellow or amber lights indicate a less urgent problem but still require service soon. The manual explains exactly what each light means and suggests actions you can take before visiting a dealership.

Jump Starting and Towing

The manual includes instructions for jump starting the SRT8, noting the correct terminal locations under the hood. It also covers proper towing procedures. Given the SRT8's low ground clearance and performance suspension, towing it incorrectly can damage the body or drivetrain. The manual specifies that the vehicle should be towed on a flatbed truck or with the rear wheels off the ground if using a dolly.

Where to Find the 2010 Dodge Charger SRT8 Owners Manual

If you have lost the physical copy of your manual, do not worry. There are several ways to obtain a replacement. The first option is to contact a Dodge dealership. They can order a printed replacement directly from Chrysler. However, this can take time and may be expensive.

The most convenient option is to download a digital version. Many websites offer the **2010 Dodge Charger SRT8 owners manual** in PDF format.
